

Covid-19 Response Plan

Racquetball's Plan for Practices

- Racquetball club already had less than 5 people per practice even before the virus changed things, so it is likely that no pods will have to be implemented.
- The matches will be limited to two players playing one on one so as to reduce the amount of contact that is made between players.
- Face coverings will be required at all times, while playing and while waiting outside the playing area as this is in an indoor facility.
- Anyone not in the playing area will be required to practice social distancing.
- Cleaning supplies will be offered to wipe down the racquets and other supplies borrowed from the UREC facility.
- We will likely not attend any competitions this season because this would require inter or possibly out of state travel which is not advisable at this time.
- The names of each person that attends a practice will be recorded along with the date practiced and the matches that they play in order to allow for proper contact tracing to be made.
- Since many people do not own their own racquets and racquetballs, these will be available for use for the participants. This equipment will be sanitized using Clorox wipes and allowed the necessary kill time before continued use if there is trading among participants.
- All shared equipment will be sanitized before and after each practice.
- Only racquets and racquetballs will be available for borrowing because gloves and goggles come in too close contact with people's skin and bodily fluids.
- If a participant wishes to use racquetball gloves or goggles/glasses, they will have to borrow from the HPER or provide their own.

Recruitment and Retention

- There are few initiatives that are essential to racquetball's ability to pursue our mission.
- The most important thing for racquetball to focus on is to begin practices and to begin reaching out to other racquetball clubs or racquetball organizations to begin networking for tournaments potentially in the Spring semester or in the 2021-22 year.
- The recruitment and retention efforts need to be brought more attention in this club overall, but the focus will be to get the word out and to make sure that everyone knows this club is for all levels of players, beginners included.
- The risks with how we typically operate is that there is contact between the players playing and those that attend the practices. This will be mitigated by screening everyone attending to find potential cases if they are showing symptoms, and to record the attendees of every practice for contact tracing.
- Because of reduced in-person experiences our organization will be hurt, but I think that our organization can still build itself through the spread of information and increasing the number of people in the GroupMe in order to get more people to come play when practices begin.

- If any new members are added in the fall, they will be added to the GroupMe and will hear about any incoming practices if they are willing to come!
- I will hopefully be starting up practices soon, and I will communicate with the previous members the changes regarding Covid-19 and any new members will be informed of the requirements when they join.
- Members who do not adhere to the guidelines created for their safety will be asked to leave the practice. If there is a second offence, they will be suspended for a week. And if there is a third, they will be asked not to return in order to ensure the safety of the other members of the club.
- Service hours will be suspended because there are very few in person service opportunities that the club can participate in. Practices have been suspended until further notice because of circumstances out of my control.
- The members of the organization who have chosen to stay fully remote from campus will still be in the GroupMe and will have all updated information from the club but will obviously not be able to attend any practices that we may hold.
